

## Walkthrough Document - JEMS-EH

Go to <https://cosc360.ok.ubc.ca/twrigh01/client/>

You'll begin as an unregistered user, this is the view of anyone who comes to the site for the first time:

- Browse the posts that seem interesting to you
- Use the title logo taking you back to the main page.
- Look at the hottest posts using the header
- View the newest posts that have been made.
- View the replies and how many likes are on your favourite post.
- View a specific user's page to see their posts (you won't be able to follow without being registered).
- Use the search function on the home page to look up any threads, categories or users.

Then try to register as a new user by using the login button situated in the header.

-Register using any information you like.

-If you successfully register, the email provided will receive an automated email welcoming you to the site.

A registered user will have access to creating threads and responding to the posts of other users in numerous ways. They'll also have a profile in the database, and be able to view the users and posts they've interacted with in the past.

- Log out
- Log In using the following:
  - Username: test
  - Password: test
- Search for a post using the search bar.
- Like it while you're here.
- Go back to the main page using the Jems-Eh button

- Filter and find the user yoda
- Reply to any post.
- Reply to any existing comments.
- Delete a comment you made.
- Follow user yoda
- View your profile information
- Change your personal information and upload a new profile picture.
  
- Make a new thread about whatever you like, for example:
  - Title: What is the best computer science course?
  - Category: COSC
  - Family friendly: yes
  - Friends only: no
  - Description: definitely COSC 360
  
- View your profile information.
- View the posts made by the users you follow.
- View the posts you've liked.

When you're ready, log out. You will log back into an admin account using  
Admin Key: admin & password: admin

An administrator of the site is expected to be able to view the statistics of the website and manage the posts and profiles of regular registered users.

- View the statistics of the website such as which users have commented the most and which user is the most followed.
- Delete a comment
- Delete a thread
- Remove a user from the website.
- Log out using the header.

This is a summary of all the key features implemented to provide users with an experience similar to Reddit or Hackernews.
